EHR Implementation — Risk-Governed Approach (Al Noor Hospital)

Overview: This project implements a governance-first deployment of a new EHR platform, aligning ISO 27001, COBIT and ITIL to secure and operate critical clinical systems in a mid-level UAE hospital.

Key Outcomes:

- ISMS scoped to EHR and integrations; Annex A controls mapped.
- Risk register created with prioritized treatments for ransomware, vendor risk, insider misuse.
- ITIL SOPs for Incident/Change/Problem established; KPI dashboard created for executive reporting.
